

Fundação CECIERJ - Vice Presidência de Educação Superior a Distância

Curso de Tecnologia em Sistemas de Computação

Disciplina: Introdução à Informática

AP3 1º semestre de 2014

GABARITO

1. (4 pontos)

1.1) D

1.2) E

1.3) D

1.4) B

1.5) A

1.6) A

1.7) E

1.8) B

2. (2 pontos)

$$\begin{aligned} \text{A)} \quad (10001011.002)_{16} - (EAC9BDC.A9F1)_{16} &= (1537434.562F)_{16} = \\ &= (1110313100310.11120233)_4 \end{aligned}$$

$$\begin{aligned} \text{B)} \quad (7020003.014)_9 - (6786548.6546)_9 &= (122343.2483)_9 = \\ &= (10202101110.0211221)_3 \end{aligned}$$

$$\begin{aligned} \text{C)} \quad (766547.7665)_8 + (775564.55766)_8 &= (1764334.54636)_8 = \\ &= (7E8DC.B33C)_{16} \end{aligned}$$

$$\begin{aligned} \text{D)} \quad (111101011.01101)_2 + (101010111.01011)_2 + (111011110.011101)_2 &= \\ &= (10100100001.001101)_2 = (2441.15)_8 \end{aligned}$$

$$\begin{aligned} \text{E)} \quad (10011001001.0011)_2 - (1011110111.11011)_2 &= \\ &= (111010001.01011)_2 = (13101.112)_4 \end{aligned}$$

3. (2 pontos)

$$F(A,B,C,D) = \sum (1, 2, 3, 4, 5, 9, 10, 11, 12, 13, 15)$$

Expressão mais simples para F:

$$F(A,B,C,D) = AD + B\bar{C} + \bar{B}C + \bar{C}D$$

ou

$$\bar{B}D$$

4. (2 pontos)

$$F(x,y,z) = \overline{\overline{x}y + z + \overline{x}yz \cdot \overline{y}z \cdot \overline{x}y} \oplus \overline{z}$$

Expressão mais simples para F:

$$F(x,y,z) = \overline{y} + \overline{z}$$

Resolução:

$$F = \overline{\overline{\overline{x}y + z + \overline{x}yz \cdot \overline{y}z \cdot \overline{x}y} \oplus \overline{z}} \quad \text{- aplicando De Morgan:}$$

$$F = \overline{\overline{x}y + z + \overline{x}y \cdot z \cdot \overline{y}z + \overline{x}y \oplus \overline{z}}$$

$$F = \overline{\overline{x}y \cdot \overline{z} + (x + \overline{y} + \overline{z}) \cdot \overline{y} \cdot z + x \cdot \overline{y} \cdot z + x \cdot \overline{y} \cdot \overline{z}}$$

$$F = (x + \overline{y}) \cdot \overline{z} + x \cdot \overline{y} \cdot z + \overline{y} \cdot \overline{y} \cdot z + \overline{z} \cdot \overline{y} \cdot z + x \cdot \overline{y} \cdot z + (\overline{x} + y) \cdot \overline{z}$$

$$F = x \cdot \overline{z} + \overline{y} \cdot \overline{z} + x \cdot \overline{y} \cdot z + \overline{y} \cdot z + 0 + x \cdot \overline{y} \cdot z + \overline{x} \cdot \overline{z} + y \cdot \overline{z}$$

$$F = \overline{z} \cdot (x + \overline{y} + \overline{x} + y) + \overline{y} \cdot z \cdot (x + 1)$$

$$F = \overline{z} + \overline{y} \cdot z \quad \text{- aplicando o teorema da absorção:}$$

$$F = \overline{z} + \overline{y}$$
